Height: 10 meters  
Riyadh and Jeddah

2019

IBRAHIM

4 Pics:  
Height: 5 meters,  
Riyadh

You Fine has undertaken series of large urban stainless steel sculpture projects for Saudi Arabia customers in recent years. All these large metal sculptures are more than five meters in height, usually ten meters. Installed in Riyadh(capital and political center) and Jeddah(business center), they are perfect as local urban landmark sculptures. Each sulptures will be offered free design drawings by YouFine talented designers. Moreover, we also provide our clients with detailed installation drawings to help them install smoothly. Our professional installation team also offers you on-site installation guidance.

For large sculptures, installation is also a very important part. Because safety and firmness need to be considered. So You Fine would provide clients with detailed installation instructions to ensure that clients could install them smoothly.

# Arab Saudi Urban Project 2018

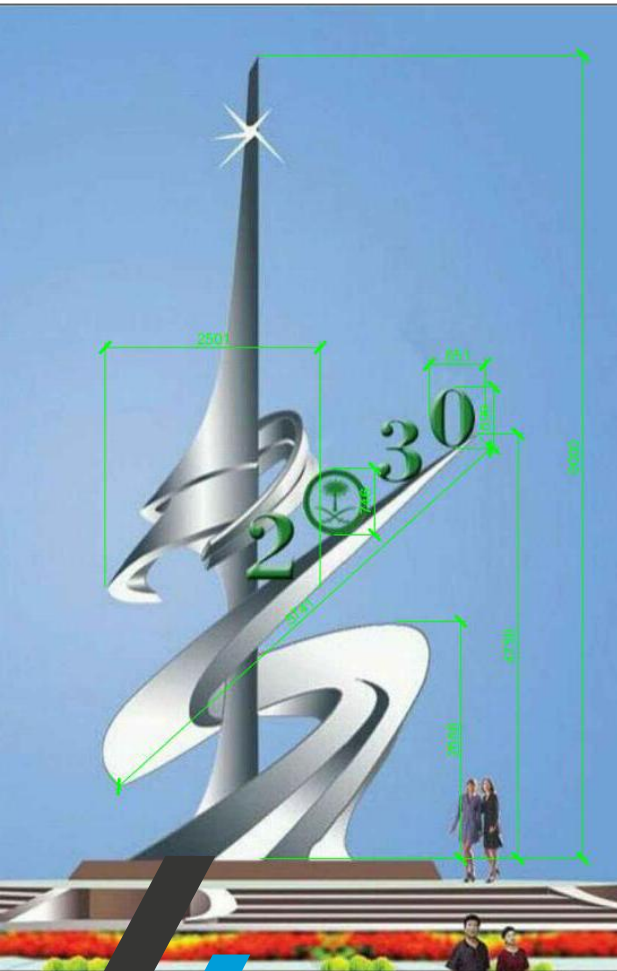

## Project Introduction

Time:	May, 2018
Name:	AHMAD HUSSAIN
Place:	Riyadh, Arab Saudi
Quantity:	5 Pics
Details:	4 Pics 10 meters high, and 1Pic 5 meters high large stainless steel sculptures

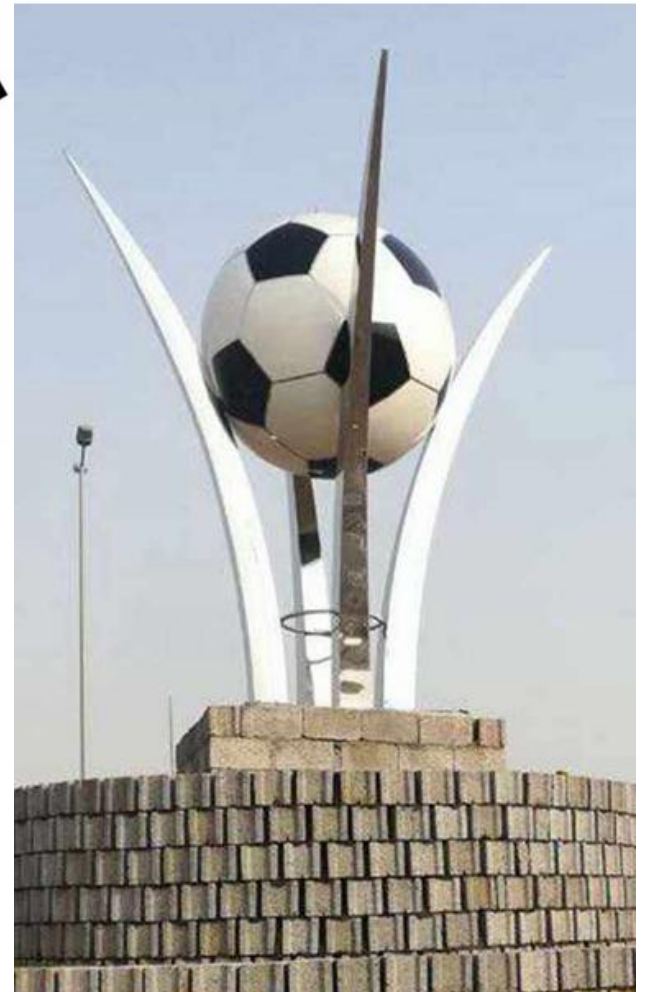

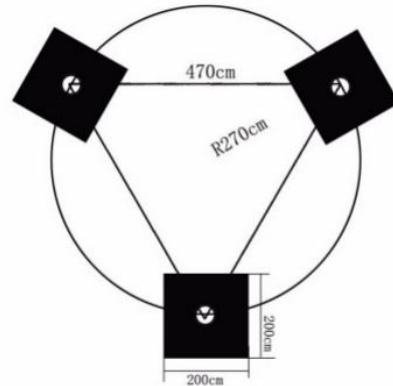

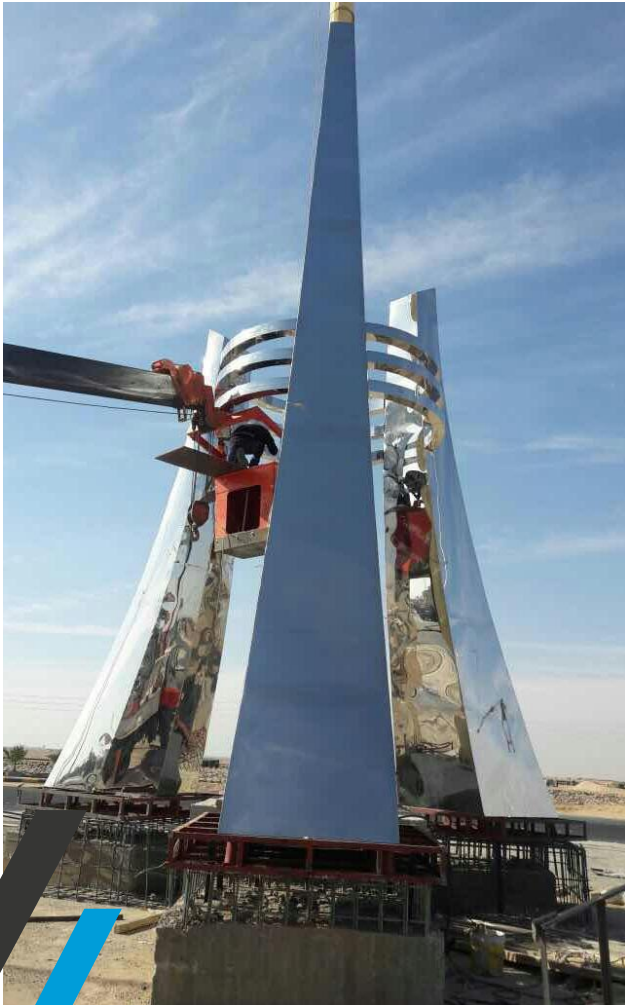

This sculpture is designed with the national emblem of Saudi Arabia, where the number "2030" means Saudi Vision 2030. Establish three vision goals for Saudi Arabia: the heart of the Arab and Islamic world, a global investment power, and a hub for Asia, Europe and Africa.

# Arab Saudi Urban Project 2019

## Project Introduction

Time:	October, 2019
Name:	IBRAHIM
Place:	Riyadh, Arab Saudi
Quantity:	4 Pics
Details:	4 Pics 5 meters high large stainless steel sculptures

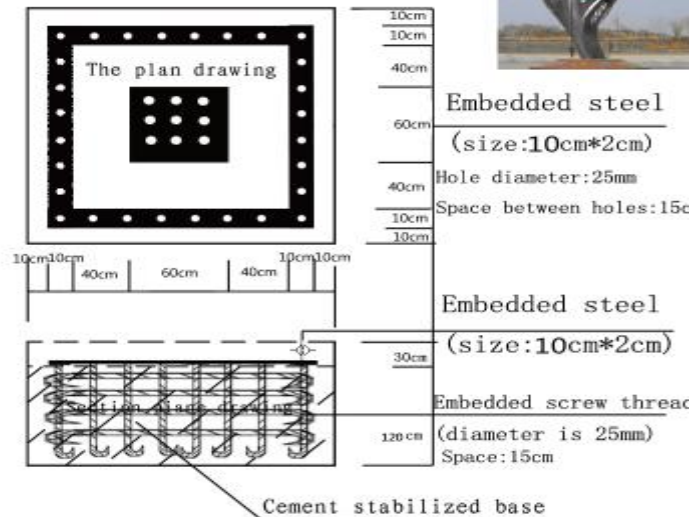

The working drawing for base of sculpture  
( 5 m)

1. The black block part is embedded part on the plan drawing (size: 180\*180mm)
2. In the section plane drawing, the part of dotted line is stack part in the end. (Height of stack part is 30cm)
3. The embedded part cannot change, others will be change above actual situation

For larger sculptures, You Fine would pack them directly into the container after wrapping them in plastic film.

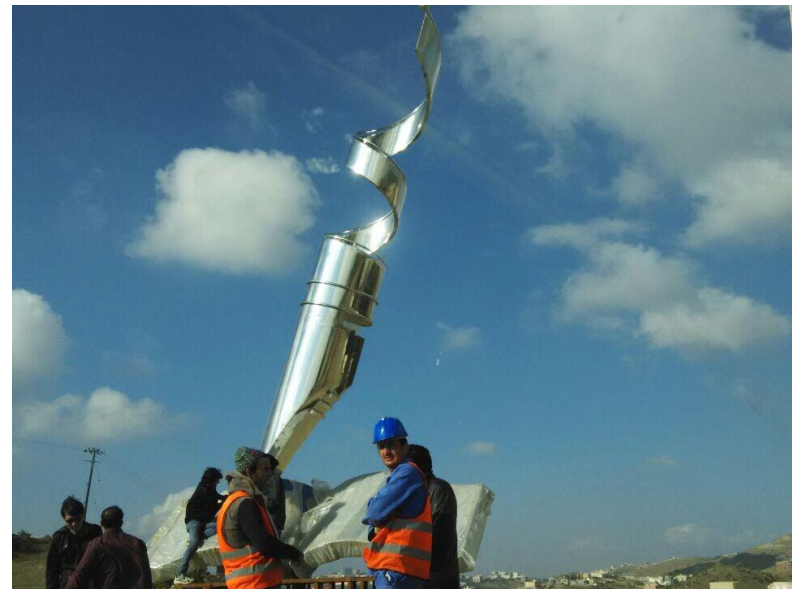

You Fine would use soft foam or plastic film to wrap the sculpture on the outside, to prevent scratches during delivery. Then fixed with iron skeletons or wooden crates, and finally put into the container.
